INFORMATION DISCLOSURE STATEMENT

Applicant requests consideration of the references listed on the attached PTO-1449 form. Under 37 C.F.R. § 1.98 (a)(2)(ii), only copies of foreign patent documents and/or non-patent literature are enclosed. Copies of any listed U.S. patents or U.S. patent application publications can be provided upon request. The cited references are cited in the International Search Report. SE 502 984 and US 5,971,065 are also mentioned on page 2 of the present application and EP 1203193 is also mentioned on page 3 of the application.

DE 3600656 is understood to disclose a plate heat exchanger with plates that appear to form a separate closed space adjacent to the inlet and/or outlet openings. This closed space is in communication with the respective inlet and/or outlet openings and with the heat transfer space located on the same side of the plate as the closed space. Consequently, except for the portholes, there are no openings extending through the plate. The channels extending through the barriers limiting the closed space seem not to be intended to have any throttling effect.

This statement is being filed within three months of the filing date of the application or before the receipt of a first Office Action on the merits. Please apply any charges or credits to Deposit Account No. 06-1050.
